

Boom Box Program

TRACTION

Young people build their own AMPLFY portable Bluetooth speaker system from upcycled e-waste, creating a one-of-a-kind, sustainable sound system that pumps pure beats!

Recommended as a follow-on program after the TRACTION Bike Build program, or for 13 years and older.

Program Includes

- Weekly 6-hour workshop for **9 weeks**
- Support for **6 young people**, chosen by your school or organisation
- **2 consistent TRACTION** mentors for the duration of the program
- **54 hours of small group mentoring** for each student
- Team building, leadership, goal setting and self-regulation activities
- Fruit and snacks for participants
- Celebration lunch and certificate presentation in the final week
- Outcomes surveys for young people, parents or guardians and schools
- An evaluation report on the outcomes of your group
- A custom-designed, painted and assembled Boom Box for each young person!

TRACTION

Curriculum

- Workshop induction and introduction to project
- Goal setting, team-building & leadership activities
- Cutting and gluing timber
- Measuring, marking and cutting ex-army ammunition boxes for cases
- Testing, soldering and assembling battery and charger circuit
- Preparing cables and connecting amplifier
- Installing speakers – test and tune
- Cover with perspex, decorate and play!

Cost & Contribution

Please enquire for program pricing.

A school staff member is also required to support students on site for the duration of the program.

To book your TRACTION Bike Build program, contact your TRACTION Regional Coordinator or call (07) 3102 9565 today!

My son has thoroughly enjoyed doing something more hands on that he can see the result of. Something tangible. I think that's the main reason for the change in behaviour. He has loved attending the program, is really thinking about his future and wants to get a job next week!
